
AN OVERVIEW OF THE

Construction Talent Retention Scheme (CTRS) AND Talentview Construction (TVC)

CHRISTIAN WARDEN

Engagement Director

One Scheme - Two platforms

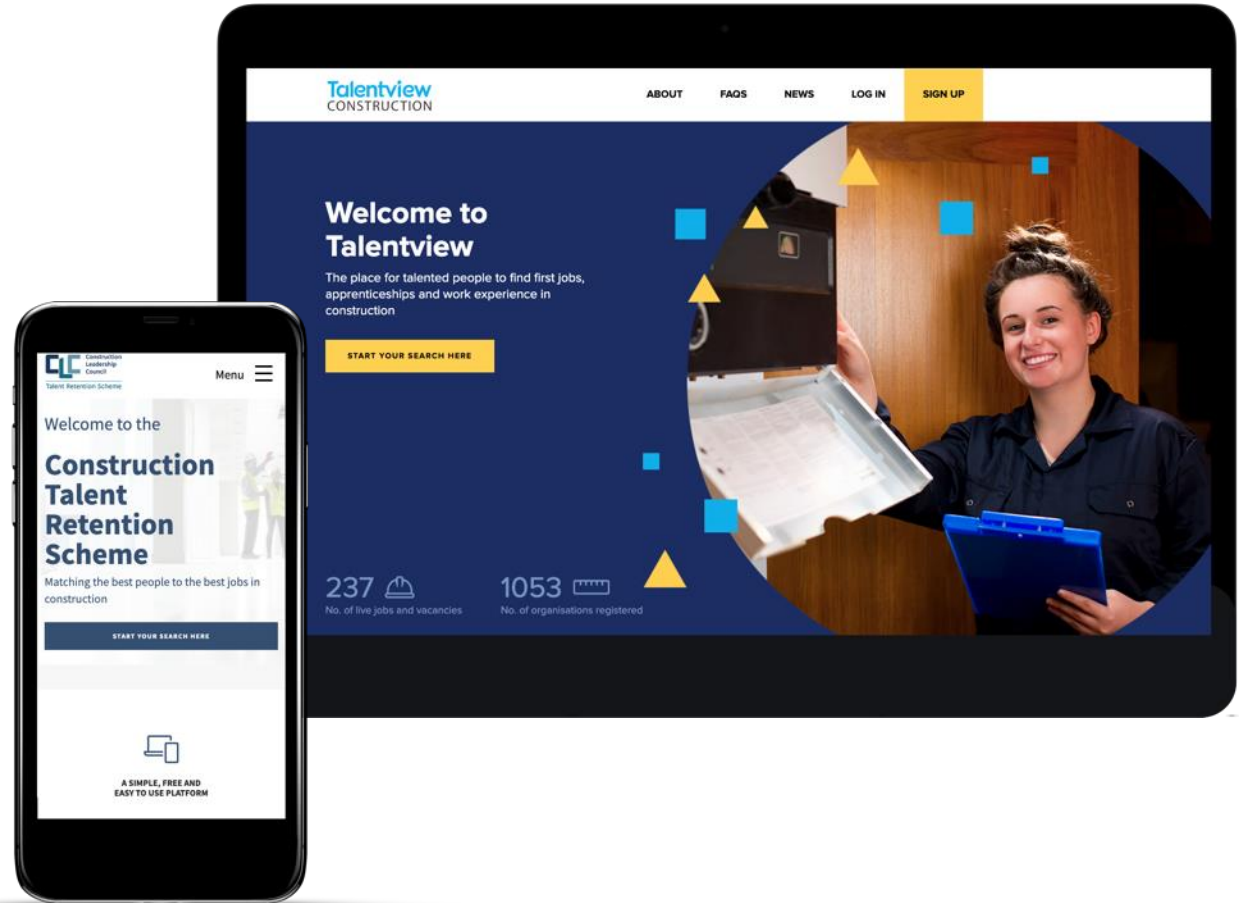

Talentview Construction (TVC) is the latest development of the **Construction Talent Retention Scheme (CTRS)**.

What's the difference?

The **CTRS** platform is aimed at **experienced candidates** and **jobs** in construction.

TVC is a launchpad platform for individuals looking for **first jobs, apprenticeships, traineeships** and other roles in construction.

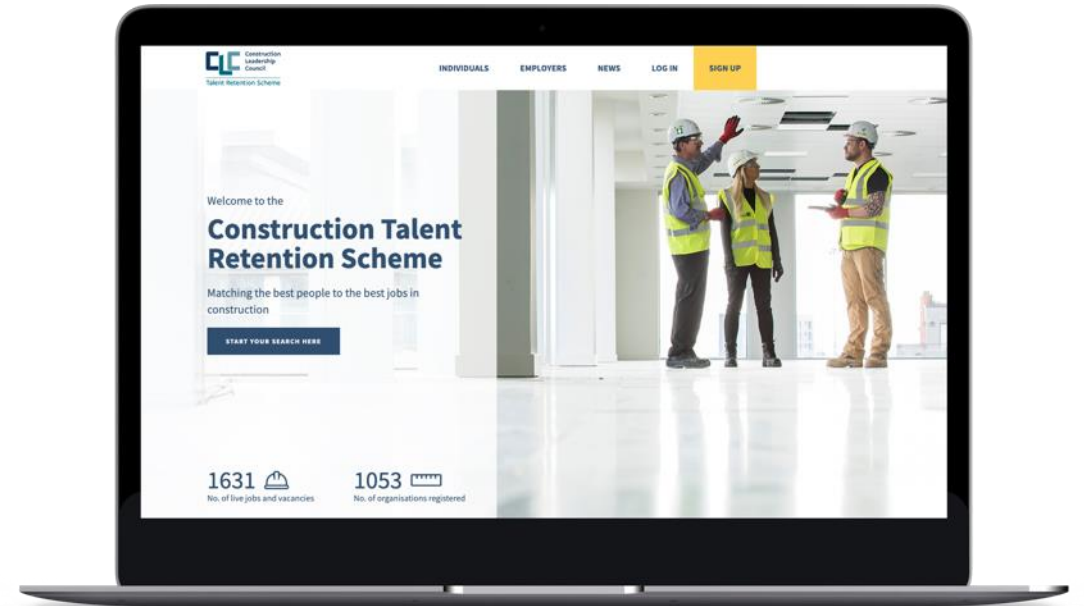

One scheme. Two platforms.

Construction Talent Retention Scheme

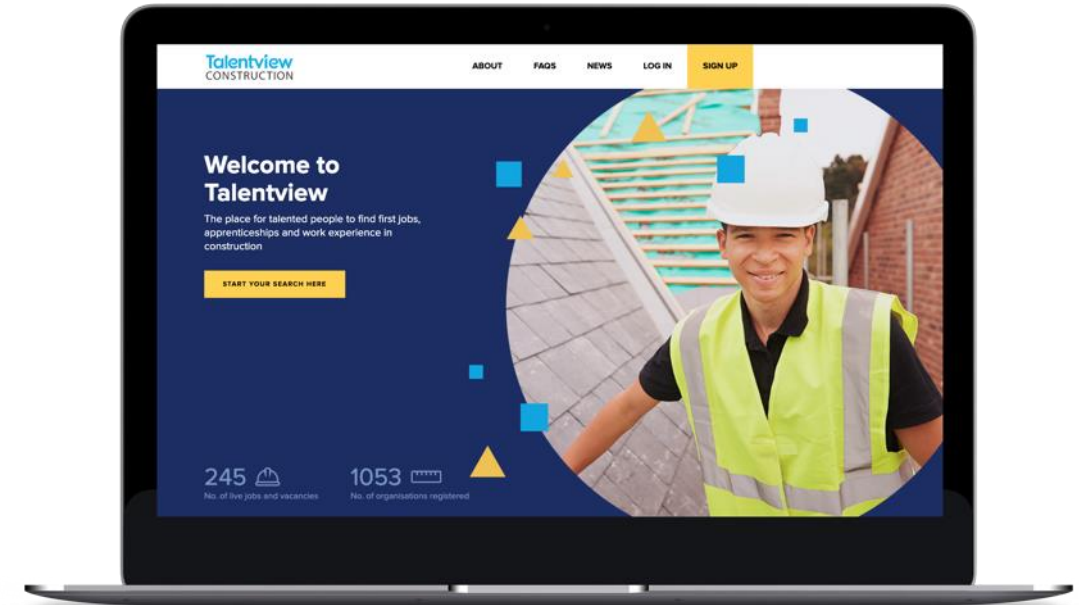

- **Designed** to assist talented individuals showcase their experience and expertise, while helping construction businesses find the skills they need.
- **Helping employers** with a simple, free and easy way to recruit and redeploy across the sector
- **Supported** by BEIS, CLC, CITB, employers, colleges and universities.
- **Open to all trades** and construction businesses across trade, technical and professional disciplines, in every part of the UK.
- **No fees, no recruitment agencies, no ads.**

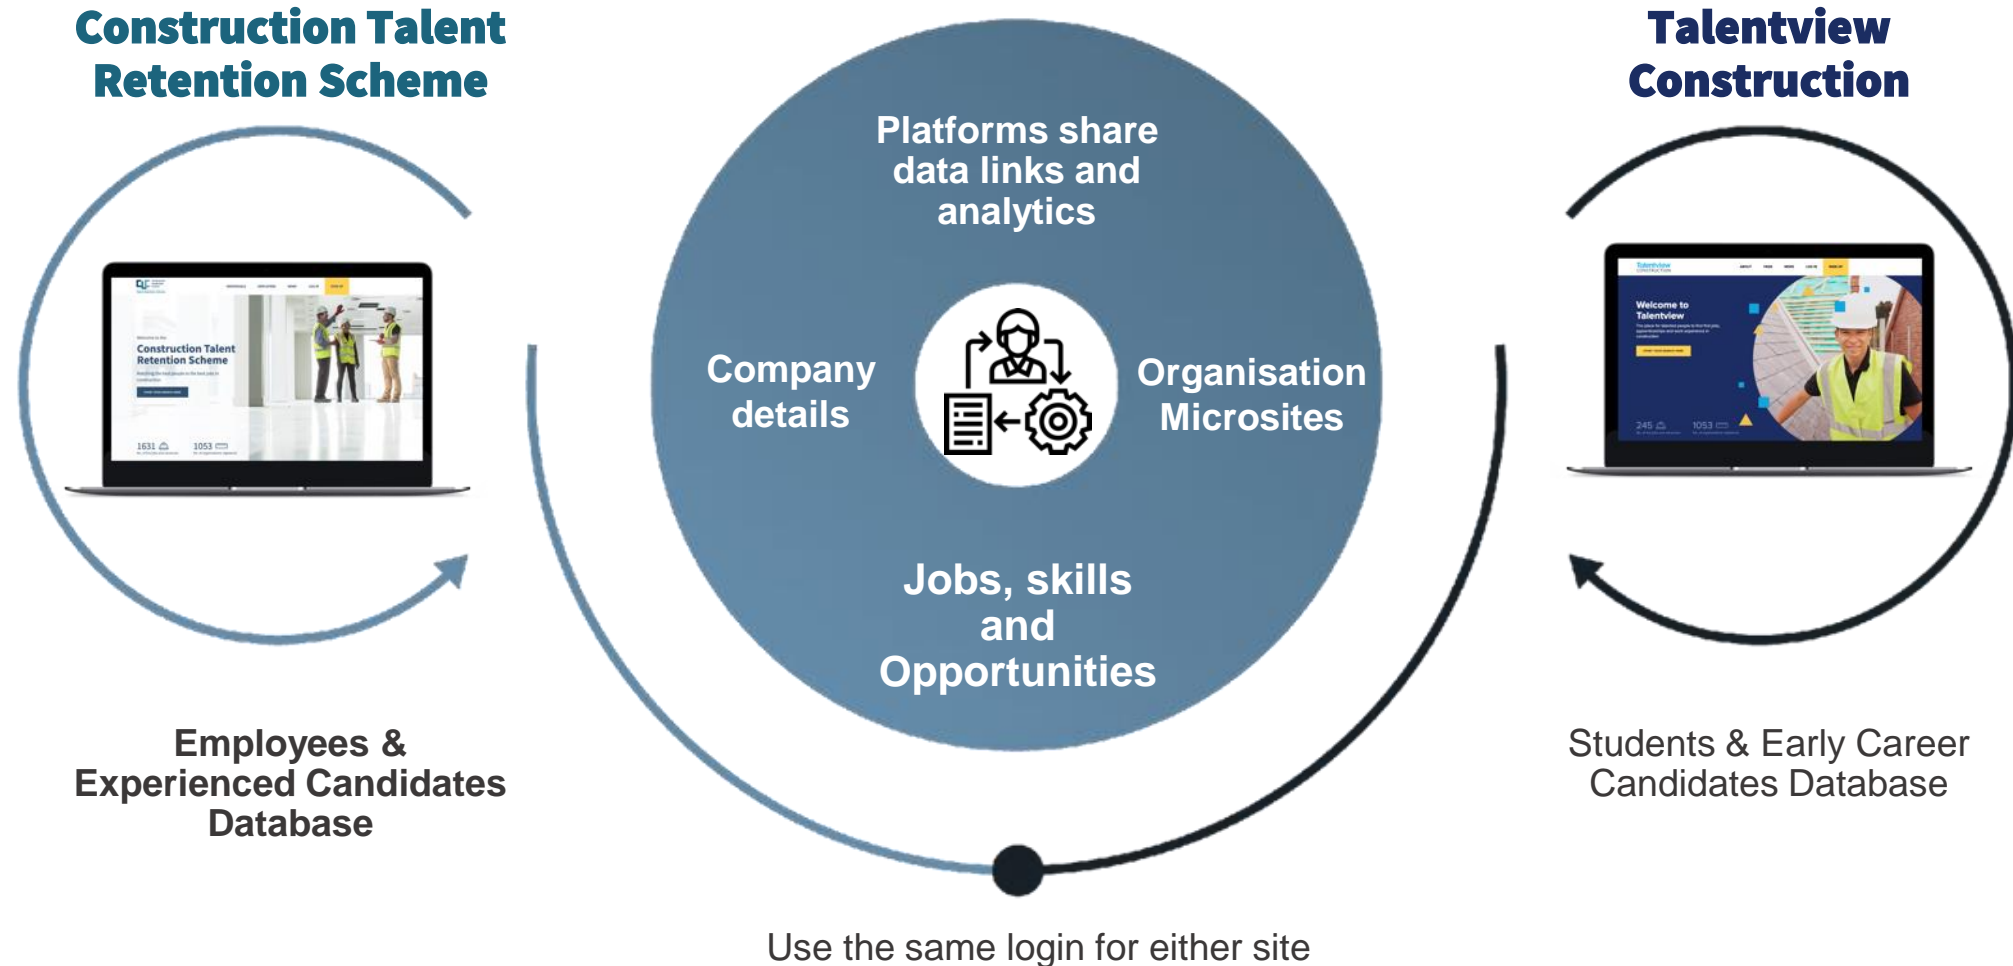

What is Talentview Construction?

- **Designed as a launchpad** for young people in schools, colleges and universities to find opportunities to join the construction sector.
- **Aimed at helping employers** showcase apprenticeship, traineeship, first roles, graduate vacancies and others and find the entry level talent they need.
- **Links closely** with NAS and Go Construct.
- **No fees, no recruitment agencies, no ads.**
- **Supported** by BEIS, CLC, CITB, employers, colleges and universities.

How do they link?

Why choose construction?

Educational resources

Home > Construction careers > What jobs are right for me? > CAD operative

CAD OPERATIVE

CAD technician, CAD engineer, BIM technician, digital design technician, civil CAD operator

Computer-aided design (CAD) operators use computer software to produce 2D and 3D drawings for construction and manufacturing projects. As a CAD operator, you may be designing buildings, machinery or component parts. You'd be taking complex information and using it to produce technical building diagrams for architects, engineers and other construction workers.

Average salary*

£ £17000 - £50000

Typical hours per week

🕒 39-41

Number employed in the UK

👤 208,050

Career path and progression

How to become a CAD operative

There are several routes to becoming a CAD operative. You could complete a university or college course, or an apprenticeship.

You should explore these routes to find out which is the right one for you. Although some of these options have certain qualification requirements, many employers are more interested in people who are enthusiastic, willing to learn and able to follow instructions.

You may need a [Construction Skills Certification Scheme](#) (CSCS) card to work on a construction site.

For Organisations

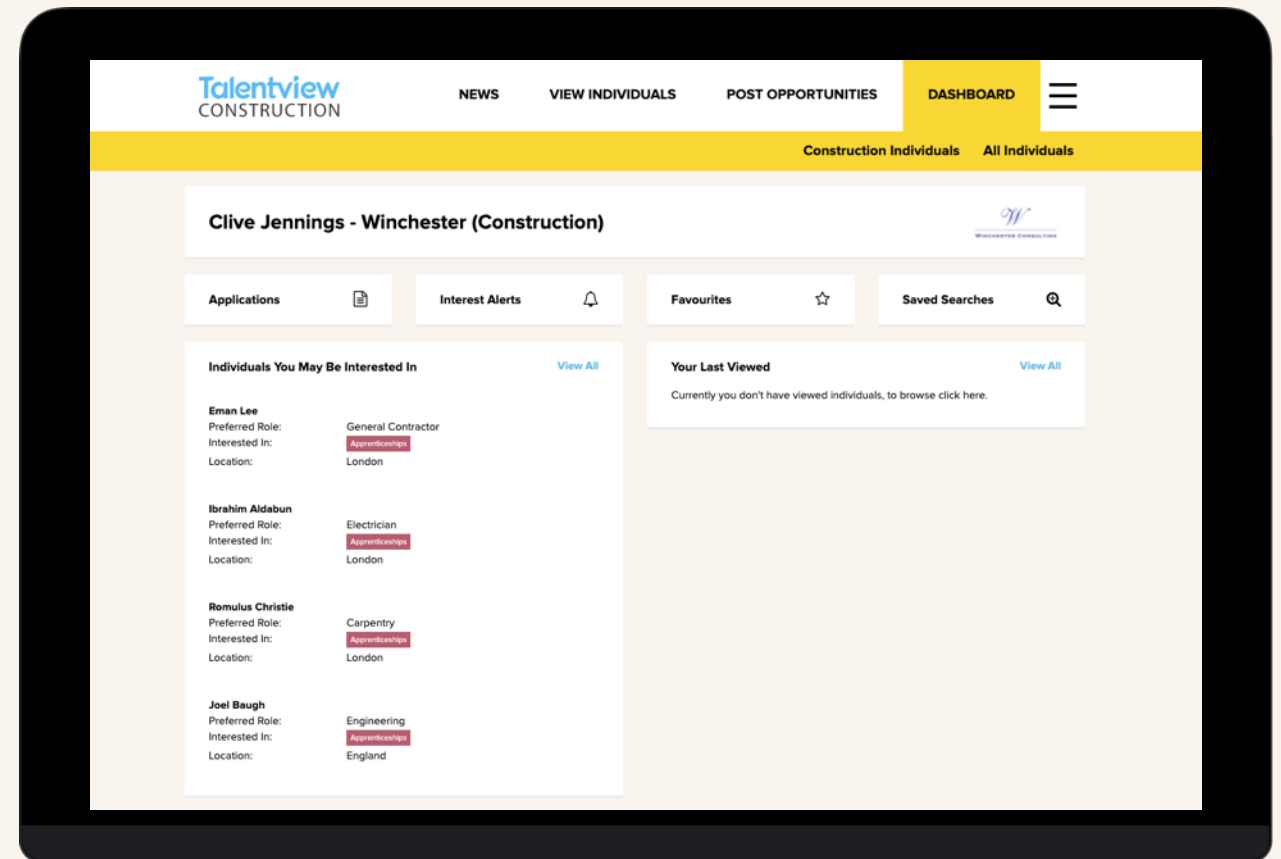

Looking to find more new recruits? Keen to find new trainees, apprentices and entry level starters?

HOW IT WORKS

- 1 Setup your company user profile
- 2 Post your jobs and vacancies
- 3 Search for talent and set alerts
- 4 Make contact with candidates directly
- 5 Sign up to our newsletter for updates
